

1. Record Nr.	UNINA9910700987503321
Autore	Hayter Sheila J
Titolo	Renewable energy applications for existing buildings [[electronic resource]] : preprint = Applicazioni dell' energia rinnovabile su edifici esistenti // Sheila J. Hayter and Alicen Kandt
Pubbl/distr/stampa	[Golden, Colo.] : , : National Renewable Energy Laboratory, , [2011]
Descrizione fisica	1 online resource (15 pages) : color illustrations, color maps
Collana	NREL/CP ; ; 7A40-52172
Altri autori (Persone)	KandtAlicen
Soggetti	Buildings - Energy conservation Renewable energy sources Architecture and energy conservation - Methodology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on September 2, 2011). Parallel title from p. [1]. "August 2011." "To be presented at the 48th AiCARR International Conference, Baveno-Lago Maggiore, Italy, September 22-23, 2011."
Nota di bibliografia	Includes bibliographical references (pages 13-15).
Sommario/riassunto	This paper introduces technical opportunities, means, and methods for incorporating renewable energy (RE) technologies into building designs and operations. It provides an overview of RE resources and available technologies used successfully to offset building electrical and thermal energy loads. Methods for applying these technologies in buildings and the role of building energy efficiency in successful RE projects are addressed along with tips for implementing successful RE projects.
