Sommario/riassunto	Les techniques qui autrefois étaient représentatives de la structure et de la diversité des civilisations, sont devenues aujourd'hui les sous-systèmes de la technologie mondiale. L'ouvrier et ses instruments risquent fort de faire les frais de ce procès d'uniformisation et d'y perdre leur identité ou, si l'on préfère, leur caractère irremplaçable. Notre époque sera-t-elle celle de « la fin des outils » ? En bien des points du globe, elle a marqué la fin de l'état de différence ; signifiera-t-elle aussi la suppression pure et simple du droit à la différence ? S'agit-il d'une évolution inéluctable, est-ce la rançon de ce que l'on appelle fort mal à propos le progrès ? Autour de ces questions essentielles, traitées selon l'optique personnelle de chaque auteur, des thèmes complémentaires ont surgi : la critique des méthodes conventionnelles d'analyse, l'importance de l'approche historique, l'étude des incidences (économiques, sociales, politiques, culturelles, écologiques, etc.) du transfert (ou du non-transfert effectif !) de technologie...

Nota di contenuto	Part one. Before the 1963 'economic reform' -- The prevention of democratic change in East Germany after World War II -- The role of the soviet military administration in Germany (SMAD) -- The foundation of the GDR on October 7, 1949 -- Stalin's diplomatic initiative in March/April -- "Accelerated construction of socialism" - the second party conference of the socialist unity party -- The 17th of June, 1953 -- The new character of the socialist unity party after the June events -- First steps towards the new economic system -- The events preceding the building of the Berlin Wall -- The building of the Berlin Wall on August 13, 1961 -- "De-Stalinization" -- A former Nazi - Ulbricht's first choice for the "economic reform" -- Final preparations -- Part two. The "new economic system of planning and leadership" (NOSPL) -- Disregard for the law of central planning -- Profit as regulator of social production -- The realization of profit through the market -- Means of production becoming commodities -- The new banking and credit system -- The reform of industrial prices -- Self-financing -- Concentration and centralization of capital -- The new premium system -- The abolition of the state monopoly on foreign

trade -- Influx of foreign capital -- The sector "commercial coordination" (KoKo) -- Debt policies -- A new capitalist class -- The GDR working class - An exploited class -- The consciousness of the GDR working class -- The GDR state - an instrument of the new ruling class -- Part three. The end of the Ulbricht era -- The plot to get rid of Walter Ulbricht -- The reasons for Ulbricht's removal: the economic crisis in the GDR in 1970 -- The "Prague spring" -- The Polish rebellion -- Honecker's "main task".

Sommario/riassunto

When East and West Germany re-united, the world was amazed -- but this great moment should have been foreseen. East Germany, the GDR, was not transformed by a counterrevolution from the outside; the leadership was always capitalist at heart. The author shows how they were undermining the socialist foundations even in the 1950s, as soon as Stalin died.
