

1. Record Nr.	UNINA9910701569103321
Titolo	Coastal construction manual : principles and practices of planning, siting, designing, constructing, and maintaining residential buildings in coastal areas
Pubbl/distr/stampa	[Washington, D.C.?] : , : Federal Emergency Management Agency, Mitigation Directorate, , 2011
Edizione	[4th ed.]
Descrizione fisica	1 online resource (253 unnumbered pages) : illustrations, maps
Soggetti	Flood damage prevention - United States House construction - Climatic factors - United States Hazardous geographic environments - United States Flood damage prevention Hazardous geographic environments House construction - Climatic factors United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on Mar. 19, 2012). "FEMA P-55 CD, volumes I and II / August 2011."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Volume I: Introduction -- Historical perspective -- Identifying hazards -- Siting -- Investigating regulatory requirements -- Fundamentals of risk analysis and risk reduction. Volume II: Pre-design considerations -- Determining site-specific loads -- Designing the building -- Designing the foundation -- Designing the building envelope -- Installing mechanical equipment and utilities -- Constructing the building -- Maintaining the building -- Retrofitting buildings for natural hazards -- Coastal construction calculation tool.
