Nota di bibliografia	Includes bibliographical references (p. 211-220) and index.
Nota di contenuto	A new take on an old term : operationalizing the diaspora concept -- An exploration of the relevant literature -- Still waters : understanding the political economy of the 1920's -- Home dock : United States and the BSL -- Charting the black Atlantic : the UNIA and its location in African-American politics -- Shipping politics : the case of the Black Star Line -- Stormy seas : government obstruction of BSL transnational goals -- Marooned : the rise and fall of the Black Star Line -- Clear waters : implications for the study of diasporas.
Sommario/riassunto	This book describes how the first African American mass political organization was able to gain support from throughout the African diaspora to finance the Black Star Line, a black merchant marine that would form the basis of an enclave economy after World War I. Ramla M. Bandele explores the concept of diaspora itself and how it has been applied to the study of emigre and other ethnic networks. In characterizing the historical and political context of the Black Star Line, Bandele analyzes the international political economy during 1919-25

and considers the black politics of the era, focusing particularly on Marcus Garvey's Universal Negro Improvement Association for its creation of the Black Star Line. She offers an in-depth case study of the Black Star Line as an instance of the African diaspora attempting to link communities and carry out a transnational political and economic project. Arguing that ethnic networks can be legitimate actors in international politics and economics, Bandele also suggests, however, that activists in any given diaspora do not always function as a unit.

Sommario/riassunto

This book constitutes the refereed proceedings of the 6th European Conference on Interactive Television, EuroITV 2008, held in Salzburg, Austria, in July 2008. The 42 revised full papers were carefully reviewed and selected from 156 submissions. The contributions cover significant aspects of the interactive television domain including submissions on user studies, technical challenges related to new developments as well as new kind of formats. The papers are organized in topical sections on interactive TV, interactive authoring, personalisation and recommender systems, mobile TV, social TV, new TV environments, iTV architectures and systems, user interfaces and interaction design, user studies, and accessibility.
