

1. Record Nr.	UNINA9910702327503321
Autore	Yegorova L. A (Larisa Alexandrovna)
Titolo	Experimental study of narrow pulse effects on the behavior of high burnup fuel rods with Zr-1%Nb cladding and UO fuel (VVER type) under reactivity-initiated accident conditions / / prepared by L. Yegorova [and eight others]
Pubbl/distr/stampa	Washington, DC : , : Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, , 2006
Descrizione fisica	1 online resource (2 volumes) : illustrations
Collana	International agreement report ; ; NUREG/IA-0213, Vol. 1; NUREG/IA-0213, Vol. 2
Soggetti	Fuel burnup (Nuclear engineering) Nuclear fuels Nuclear reactors - Reactivity
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on Feb. 13, 2013) "Prepared for U.S. Nuclear Regulatory Commission (United States), Institute for Radiological Protection and Nuclear Safety (France), and Joint Stock Company "TVEL" (Russian Federation)." "March 2006"--Vol. 2. "May 2006"--Vol. 1. "NSI RRC KI 3230, IRSN/DPAM 2005-275."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	vol. 1. Program approach and analysis of results -- vol. 2. Test conditions and results.
