Sommario/riassunto	In an effort to improve the U.S. military's flexibility to address conventional and terrorist threats worldwide, the Department of Defense (DOD) plans to relocate more than 8,000 Marines and an estimated 9,000 dependents from Okinawa, Japan, to Guam as well as expand other U.S. force capabilities on the island at an estimated cost of more than \$13 billion. DOD plans to begin construction on Guam during fiscal year 2010 in order to meet the desired buildup deadline of fiscal year 2014 indicated in the agreement reached by the U.S.-Japan Security Consultative Committee on October 29, 2005. As a result of the military buildup, Guam's current population of 171,000 will increase by an estimated 25,000 active duty military personnel and dependents (or 14.6 percent), to 196,000.

Sommario/riassunto	Gradation is usually considered to be a property of adjectives. Examples like 'The boy loves his mother very much' and 'The boy has grown a lot' reveal that gradation is not limited to adjectives but verbs are gradable too. Verb gradation has received considerably less attention in the literature than gradation of adjectives. The aim of the current volume is to explore the notion of verb gradation in more detail. The book presents a semantic as well as a syntactic analysis of verb gradation and combines three case studies with a general perspective on the phenomenon. Issues addressed in the volume cover, among others, the notion of scalarity in the verbal domain, the interaction of verb gradation with grammatical as well as lexical aspect and verb gradation as a subcompositional phenomenon. These topics are investigated from a cross-linguistic perspective. The languages of investigation include, among others, German, Russian and French.
