Note generali	"February 2009." "ORNL/TM-2008/117." "This report is an update of the original version, which was published in October 2008. This updated report includes results from the complete 16-vehicle fleet (the original report included only the first 13 vehicles tested) as well as corrections to minor errors identified in some of the originally reported data. Conclusions drawn from the complete dataset are nearly identical to those from the original 13-vehicle fleet but with increased statistical confidence." See p.xiv for a list of significant changes to the report content.
