Sommario/riassunto

Luke's two-volume work contains the only narrative depictions of Jesus' ascent into heaven in the New Testament. The significance of the event at the end of the Gospel and the beginning of Acts have long been recognized. While select studies have focused on particular aspects of these accounts, however, the importance of the ascension to Luke-Acts calls for renewed attention to the narratological and theological significance of these accounts. Here, leading scholars discuss the ancient, literary and theological contexts of the ascent-into-heaven accounts for the next generation of interpreters.

Intrinsic and extrinsic constraints on argumentative discourse

3. Direct-to-consumer prescription drug advertisements

4. DTCA as an argumentative activity type; 5. Example: Nexium advertisement; 6. Conclusion; References; The strategic function of variants of pragmatic argumentation in health brochures; 1. Introduction; 2. A pragma-dialectical approach to pragmatic argumentation; 3. Dialectical options in the argumentation stage; 4. Choosing pragmatic argumentation to address doubt towards the standpoint; 4.1 Dialectical relevance of choosing pragmatic argumentation; 4.2 Rhetorical advantage of choosing pragmatic argumentation

5. Choosing pragmatic argumentation to address criticism

Sommario/riassunto

This chapter is concerned with the reasons why sometimes good arguments in health communication leaflets fail to convince the targeted audience. As an illustrative example it uses the age-dependent eligibility of women in the Netherlands to receive routine breast cancer screening examinations: according to Dutch regulations women under 50 are ineligible for them. The present qualitative study rests on and complements three experimental studies on the persuasiveness of mammography information leaflets; it uses interviews to elucidate reasons why the arguments in the health communication leaflet
