

1. Record Nr.	UNINA9910703879703321
Autore	Cheng Lap-Yan
Titolo	BWR anticipated transients without scram in the MELLLA+ expanded operating domain / / Lap-Yan Cheng [and five others]
Pubbl/distr/stampa	Washington, D.C. : , : United States Nuclear Regulatory Commission, Office of Nuclear Regulatory Research, , June 2015
Descrizione fisica	1 online resource (4 volumes) : color illustrations
Soggetti	Boiling water reactors - Performance - Testing - Computer simulation Boiling water reactors - Performance - Technological innovations Nuclear power plants - Safety measures - Computer programs Nuclear power plants - Safety measures - Testing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on July 23, 2015). "Manuscript completed: April 2014; Date published: June 2015." "NUREG/CR-7179, BNL-NUREG-105325-2014"--Part 1. "NUREG/CR-7180, BNL-NUREG-105327-2014"--Part 2. "NUREG/CR-7181, BNL-NUREG-105328-2014"--Part 3. "NUREG/CR-7182, BNL-NUREG-105330-2014"--Part 4.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Part 1 : Model development and events leading to instability -- Part 2 : Sensitivity studies for events leading to instability -- Part 3 : Events leading to emergency depressurization -- Part 4 : Sensitivity studies for events leading to emergency depressurization.
