Toward a Greater Lebanon -- Conclusion -- Notes -- Bibliography -- Index
	Sommario/riassunto	In this fascinating study, Carol Hakim presents a new and original narrative on the origins of the Lebanese national idea. Hakim's study

reconsiders conventional accounts that locate the origins of Lebanese nationalism in a distant legendary past and then trace its evolution in a linear and gradual manner. She argues that while some of the ideas and historical myths at the core of Lebanese nationalism appeared by the mid-nineteenth century, a coherent popular nationalist ideology and movement emerged only with the establishment of the Lebanese state in 1920. Hakim reconstructs the complex process that led to the appearance of fluid national ideals among members of the clerical and secular Lebanese elite, and follows the fluctuations and variations of these ideals up until the establishment of a Lebanese state. The book is an essential read for anyone interested in the evolution of nationalism in the Middle East and beyond.

Nota di contenuto	System Security -- Privacy-Friendly Access Control Based on Personal Attributes -- Are You Threatening my Hazards? -- Complicating Process Identification by Replacing Process Information for Attack Avoidance -- Kernel Memory Protection by an Insertable Hypervisor which has VM Introspection and Stealth Breakpoints -- Key Management for Onion Routing in a True Peer to Peer Setting (short paper) -- Threshold Cryptography -- Cheater Identifiable Secret Sharing Schemes Via Multi-Receiver Authentication -- Cheating Detectable Secret Sharing Schemes Supporting an Arbitrary Finite Field (short paper) -- Secure Multi-party Computation for Elliptic Curves (short paper) -- More Constructions of Re-splittable Threshold Public Key Encryption (short paper) -- Hardware Security -- How to Effectively Decrease the Resource Requirement in Template Attack? -- Deterministic Hard Fault Attack on Trivium (short paper) -- DPA Resilience of Rotation-Symmetric S-boxes -- A Technique using PUFs for protecting circuit layout designs against Reverse Engineering -- Hydra: An energy-efficient programmable cryptographic coprocessor

supporting elliptic-curve pairings over fields of large characteristics -- Foundation.-On the Security Proof of an Authentication Protocol from Eurocrypt 2011 -- Improved Linear Cryptanalysis of Reduced-Round MIBS -- Characterization of EME with Linear Mixing -- Exponentiation inversion problem reduced from fixed argument pairing inversion on twistable Ate pairing and its difficulty (short paper) -- Encryption -- Related Key Secure PKE from Hash Proof Systems -- Towards Symmetric Functional Encryption for Regular Languages with Predicate Privacy (short paper) -- Framework for Efficient Search and Statistics Computation on Encrypted Cloud Data (short paper).

Sommario/riassunto	This book constitutes the refereed proceedings of the 9th International Workshop on Security, IWSEC 2014, held in Hirosaki, Japan, in August 2014. The 13 regular papers presented together with 8 short papers in this volume were carefully reviewed and selected from 55 submissions. The focus of the workshop was on the following topics: system security, threshold cryptography, hardware security, foundation, and encryption.
