

1. Record Nr.	UNINA9910705745003321
Autore	Hulsemann Jobst
Titolo	Calcium carbonate, organic carbon, and nitrogen in sediments from drill holes on the continental margin off Florida // by Jobst Hulsemann; prepared in cooperation with the Woods Hole Oceanographic Institution and the Joint Oceanographic Institutions' Deep Earth Sampling program
Pubbl/distr/stampa	Washington : , : United States Department of the Interior, Geological Survey, , 1968
Descrizione fisica	1 online resource (v, B10 pages) : illustrations
Collana	Geological Survey professional paper ; ; 581-B
Soggetti	Continental shelf - Florida Marine sediments - Analysis Continental shelf Florida
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed September 24, 2014). "Drilling on the continental margin off Florida." "Analytical results and interpretations of organic constituents of core samples from the continental shelf, the Florida-Hatteras Slope, and the Blake Plateau."
Nota di bibliografia	Includes bibliographical references (page B10).
