Note generali	"December 2014." Chiefly tables. "This report describes and compares the characteristics of student and nonstudent female victims of rape and sexual assault, the attributes of the victimization, and the characteristics of the offender. The findings are from the Bureau of Justice Statistics' (BJS) National Crime Victimization Survey (NCVS), which collects information on nonfatal crimes reported and not reported to police against persons age 12 or older. Rape and sexual assault are defined by the NCVS to include

completed and attempted rape, completed and attempted sexual assault, and threats of rape or sexual assault (see Methodology). Unless otherwise noted, this report presents aggregate estimates of rape and sexual assault victimization for the period 1995 through 2013. Aggregating data across the period increases the reliability and precision of estimates and facilitates comparisons of detailed victimization characteristics."
