

1. Record Nr.	UNINA9910706553903321
Titolo	Advancing U.S. interests at the United Nations : hearing before the Committee on Foreign Affairs, House of Representatives, One Hundred Fifteenth Congress, first session, June 28, 2017
Pubbl/distr/stampa	Washington : , : U.S. Government Publishing Office, , 2017
Descrizione fisica	1 online resource (iii, 143 pages)
Soggetti	Human rights - International cooperation Human trafficking - Prevention - International cooperation Peace-building - International cooperation Security, International Ballistic missiles - Korea (North) Legislative hearings.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Paper version available for sale by the Superintendent of Documents, U. S. Government Publishing Office. "Serial No. 115-68."

2. Record Nr.	UNINA9910298646303321
Titolo	Foodinformatics : Applications of Chemical Information to Food Chemistry / / edited by Karina Martinez-Mayorga, José Luis Medina-Franco
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-10226-5
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (258 p.)
Disciplina	54 540 615.19 641.3
Soggetti	Food—Biotechnology Communication in chemistry Pharmaceutical chemistry Food Science Documentation and Information in Chemistry Medicinal Chemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	1. Introduction to Molecular Similarity and Chemical Space -- 2. The Chemical Space of Flavors.- 3. Chemoinformatics Analysis and Structural Similarity Studies of Food-Related Databases -- 4. Reverse Pharmacognosy: A Tool to Accelerate the Discovery of New Bioactive Food Ingredients -- 5. Molecular Approaches to Explore Natural and Food-Compound Modulators in Cancer Epigenetics and Metabolism -- 6. Discovery of natural products that modulate the activity of PPARgamma: a source for new antidiabetics -- 7. DPP-IV, An Important Target for Anti-diabetic Functional Food Design. -- 8. Comparison of Different Data Analysis Tools to Study the Effect of Storage Conditions on Wine Sensory Attributes and Trace Metal Composition.- 9. Software and Online Resources: Perspectives and

Potential Applications.

Sommario/riassunto

The explosion in the generation of information parallels the explosion of computational resources. The use of computers to collect, store and manipulate chemical information is at the heart of chemoinformatics. These methodologies, whose main target thus far has been the pharmaceutical field, are general and can be applied to other types of chemical data sets, such as those containing food chemicals. While the use of chemical information methodologies to address food-related challenges is still in its infancy, interest is growing and will continue to do so as the methods prove useful, particularly for providing practical solutions to food industry challenges. Foodinformatics gives an overview of basic concepts, applications, tools and perspectives of the emerging field of foodinformatics. The book is an important addition to the literature and will be of interest of food chemists, nutritionists, informaticians and scientists of related fields. About the Editors Karina Martínez-Mayorga, Instituto de Química, UNAM, Mexico City, México and Torrey Pines Institute for Molecular Studies, Port St. Lucie, FL, USA José Luis Medina-Franco, Instituto de Química, UNAM, Mexico City, México, and Torrey Pines Institute for Molecular Studies, Port St. Lucie, FL, USA.
