

1. Record Nr.	UNINA9910707708903321
Autore	Sohn I. G (Israel Gregory), <1911-2000.>
Titolo	Theriosynoecum wyomingense (Branson, 1935), a possible guide ostracode to the salt water mash member of the Morrison formation // by I.G. Sohn and R.E. Peck
Pubbl/distr/stampa	[Washington, D.C.] : , : United States Department of the Interior, Geological Survey Washington : , : United States Government Printing Office
Descrizione fisica	1 online resource (iii, 10 pages) : map
Collana	Contributions to general geology Geological Survey bulletin ; ; 1161-A
Altri autori (Persone)	PeckRaymond E
Soggetti	Geology - Colorado Plateau Paleontology - Jurassic Geology Jurassic Geologic Period Paleontology Colorado Plateau United States Colorado Plateau
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	This volume was published as separate chapters A-I in Contributions to General Geology 1962. "The ostracode species Theriosynoecum wyomingense (Branson, 1935) appears to be restricted to the Salt Wash Member of the Morrison Formation in the Colorado Plateau area and to equivalents of the Salt Wash Member in lithologically undifferentiated sedimentary rocks in Wyoming, South Dakota, and Montana. Associated charophytes tend to support this hypothesis."
Nota di bibliografia	Includes bibliographical references (pages A9-A10).
