

1. Record Nr.	UNINA9910968883203321
Autore	Covello Vincent T
Titolo	Risk Assessment Methods : Approaches for Assessing Health and Environmental Risks // by V.T. Covello, M.W. Merkhoher
Pubbl/distr/stampa	New York, NY : , : Springer US : , : Imprint : Springer, , 1993
ISBN	1-4899-1216-9
Edizione	[1st ed. 1993.]
Descrizione fisica	1 online resource (xiv, 319 pages) : illustrations
Disciplina	333.7
Soggetti	Environmental management Public health Environmental Management Public Health
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1 Introduction to Risk Assessment -- 2 Release Assessment -- 3 Exposure Assessment -- 4 Consequence Assessment -- 5 Risk Estimation -- 6 An Evaluation of the State of the Art -- References.
Sommario/riassunto	<p>Much has already been written about risk assessment. Epidemiologists write books on how risk assessment is used to explore the factors that influence the distribution of disease in populations of people. Toxicologists write books on how risk assessment involves exposing animals to risk agents and concluding from the results what risks people might experience if similarly exposed. Engineers write books on how risk assessment is utilized to estimate the risks of constructing a new facility such as a nuclear power plant. Statisticians write books on how risk assessment may be used to analyze mortality or accident data to determine risks. There are already many books on risk assessment--the trouble is that they all seem to be about different subjects! This book takes another approach. It brings together all the methods for assessing risk into a common framework, thus demonstrating how the various methods relate to one another. This produces four important benefits: • First, it provides a comprehensive reference for risk assessment. This one source offers readers concise explanations of the many methods currently available for describing and quantifying</p>

diverse types of risks. • Second, it consistently evaluates and compares available risk assessment methods and identifies their specific strengths and limitations. Understanding the limitations of risk assessment methods is important. The field is still in its infancy, and the problems with available methods are disappointingly numerous. At the same time, risk assessment is being used.

2. Record Nr.	UNINA9910708001603321
Titolo	Colorado ferberite and the wolframite series
Pubbl/distr/stampa	Washington, : Govt. print. off, 1914
Descrizione fisica	1 online resource
Soggetti	Ferberite Wolframite group
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
