Sommario/riassunto	Best Tent Camping: Florida will guide you to the quietest, most beautiful, most secure, and best managed campgrounds in Florida. Painstakingly selected from more than 1,000 campgrounds in the forest, in the swamps, and on the coast, each campsite is rated for beauty, noise, privacy, security, spaciousness, and cleanliness. Each campground profile provides essential details on facilities, reservations, fees, and restrictions, as well as an accurate, easy-to-read map, making the campground easily accessible. Well-traveled outdoors writer Johnny Molloy has used his wealth of experience and scoured the entirety of Florida for this updated edition -- choosing only the most pristine campgrounds that include great locales for tent campers and feature fun outdoors activities nearby, most as close as your tent door. Whether you are a native Floridian in search of new territory or an out-of-state vacationer, Best Tent Camping unlocks the secrets to finding and enjoying the best tent-camping experiences in Florida.

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Modelling of risk factors -- Setting up a multistage stochastic program -- Model output and performance analysis -- Full program code for all described steps in open-source statistical programming language R.
Sommario/riassunto	Customer accounts that neither have a fixed maturity nor a fixed interest rate represent a substantial part of a consumer bank's funding. The modelling for their risk management and pricing is a challenging yet crucial task in today's asset/liability management, with increasing computational power allowing for new approaches. Jeffry Straßer

outlines an implementation of a state-of-the-art dynamic replication model in detail. A case study with recent data supports the expected superiority of the model. Additionally, it provides tangible recommendations for model specifications derived from practical and mathematical consideration, as well as empirical findings. Practitioners will appreciate the comprehensive programming code attached.   Contents Modelling of risk factors Setting up a multistage stochastic program Model output and performance analysis Full program code for all described steps in open-source statistical programming language R   Target Groups Researchers and students in the field of bank (risk) management, statistics and business informatics Practitioners in bank management, bank risk management, and bank regulation   The Author Jeffry Straßer MA obtained his master´s degree at the University of Applied Sciences bfi Vienna in the programme "Quantitative Asset and Risk Management".
