

1. Record Nr.	UNINA9910708641103321
Autore	Markewich Helaine W.
Titolo	An overview of Pleistocene and Holocene inland dunes in Georgia and the Carolinas : morphology, distribution, age, and Paleoclimate / / H.W. Markewich and William Markewich
Pubbl/distr/stampa	Washington : , : United States Government Printing Office, , 1994
Descrizione fisica	1 online resource (iv, 32 pages) : illustrations, maps
Collana	U.S. Geological Survey bulletin ; ; 2069
Soggetti	Geology, Stratigraphic - Holocene Geology, Stratigraphic - Pleistocene Sand dunes - Georgia Sand dunes - North Carolina Sand dunes - South Carolina Geology, Stratigraphic Holocene Geologic Period Pleistocene Geologic Epoch Sand dunes Georgia North Carolina South Carolina
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed August 25, 2014). Also available online in PDF format from the U.S. Geological Survey Warehouse (http://pubs.er.usgs.gov/). "Inland dunes in the Southeastern United States represent periods of low precipitation and (or) monsoon conditions with persistent and (or) recurrent West and Southwest winds. Geomorphic position, stratigraphic position, and C-14 ages suggest that the most recent period of dune formation began some time after 15 ka and ended between 5 and 3 ka."
Nota di bibliografia	Includes bibliographical references (pages 29-32).
