| Autore | Chao E. C. T. |
| Titolo | Comparison of the Cretaceous-Tertiary boundary impact events and the 0.77-Ma Australasian tektite event : relevance to mass extinction // by E.C.T. Chao |
| Pubbl/distr/stampa | [Washington, D.C.] : , : United States Government Printing Office, , 1993 |
| Descrizione fisica | 1 online resource (iv, 22 pages) : illustrations, maps |
| Collana | U.S. Geological Survey bulletin ; ; 2050 |
| Soggetti | Cretaceous-Paleogene boundary Extinction (Biology) Tektite Cretaceous-Tertiary boundary |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Title from title screen (viewed August 25, 2014). "Reinterpretation of iridium anomalies, shocked quartz, and microtektites attributed to cratering events in Cretaceous-Tertiary boundary sections. Evidence from the Ries crater of Germany and Australasian tektites is essential to understanding giant craters and mass extinction." |
| Nota di bibliografia | Includes bibliographical references (pages 19-22). |
