

1. Record Nr.	UNINA9910709597003321
Autore	Waltermire David
Titolo	Guidelines for the creation of interoperable software identification (SWID) tags // David Waltermire; Brant A. Cheikes; Larry Feldman; Greg Witte
Pubbl/distr/stampa	Gaithersburg, MD : , : U.S. Dept. of Commerce, National Institute of Standards and Technology, , 2016
Descrizione fisica	1 online resource (86 pages) : illustrations (black and white)
Collana	NISTIR ; ; 8060
Altri autori (Persone)	CheikesBrant A FeldmanLarry WaltermireDavid WitteGreg
Soggetti	Computer software - Development - Management Computer software
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	April 2016. Contributed record: Metadata reviewed, not verified. Some fields updated by batch processes. Title from PDF title page (viewed April 30, 2016).
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This report provides an overview of the capabilities and usage of software identification (SWID) tags as part of a comprehensive software lifecycle. As instantiated in the International Organization for Standardization/International Electrotechnical Commission 19770-2 standard, SWID tags support numerous applications for software asset management and information security management. This report introduces SWID tags in an operational context, provides guidelines for the creation of interoperable SWID tags, and highlights key usage scenarios for which SWID tags are applicable.
