Sommario/riassunto	<p>Thirty Rules for Healthcare Leaders is the essential guide for everyone in healthcare, from those just starting their careers to those who are established leaders. The authors have been in leadership roles within healthcare systems for several years, and have carefully studied healthcare leadership during site visits to hospitals around the world. The book presents practical and timely advice packaged in pithy "pearls" that can be used by time-pressured professionals. Original artwork makes each rule memorable. Meant to be read in one sitting, or one at a time, Thirty Rules for Healthcare Leaders speaks to a broad range of healthcare professionals, regardless of title or experience. If you work in healthcare, this is your new must-read book.</p>

Sommario/riassunto	Arguing that there are ways to move beyond the limitations of methodological atheism without compromising scientific objectivity, the essays gathered in The Science and Theology of Godly Love explore the potential for collaboration between social science and theology. They do so within the context of the interdisciplinary study of Godly Love, which examines the perceived experience of loving God, being loved by God, and thereby being motivated to engage in selfless service

to others. This volume serves as an introduction to and a call for further research in this new field of study, offering ten methodological perspectives on the study of Godly Love written by leading social scientists and theologians. Drawing on the work of Douglas Porpora and others, the contributors contend that agnosticism is the appropriate methodological stance when religious experience is under the microscope. Godly Love does not force a theistic explanation on data, instead these essays show that it sensitizes researchers so that they can take seriously the faith and beliefs of those they study without the assumption that these theologies represent an incontestable truth.
