

1. Record Nr.	UNINA9910709727503321
Autore	Gibson Thomas G.
Titolo	Larger foraminifer biostratigraphy of PEACE boreholes, Enewetak Atoll, western Pacific Ocean // by Thomas G. Gibson and Richard Margerum; prepared in cooperation with the Defense Nuclear Agency
Pubbl/distr/stampa	Washington : , : Department of the Interior, U.S. Geological Survey, , 1991
Descrizione fisica	1 online resource (iii, D14 pages) : illustrations, map
Collana	U.S. Geological Survey professional paper ; ; 1513D Geologic and geophysical investigations of the Enewetak Atoll, Republic of the Marshall Islands
Soggetti	Foraminifera, Fossil Paleontology - Miocene Paleontology - Pleistocene Paleontology - Marshall Islands - Enewetak Atoll Miocene Geologic Epoch Paleontology Pleistocene Geologic Epoch Marshall Islands Enewetak Atoll
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Larger foraminiferal and some smaller foraminiferal data from Enewetak Atoll boreholes were integrated into a local benthic foraminiferal and ostracode biostratigraphy for correlation with Pacific biostratigraphic sequences."
Nota di bibliografia	Includes bibliographical references (pages D13-D14).
