

1. Record Nr.	UNINA9910709840803321
Titolo	Ambulatory care: France, Federal Republic of Germany, and United States, 1981-83
Pubbl/distr/stampa	Hyattsville, Maryland : , : U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control, National Center for Health Statistics, , 1989
Descrizione fisica	1 online resource (vii, 78 pages) : illustrations
Collana	Vital and health statistics. Series 5, Comparative international vital and health statistics report ; ; no. 5 DHHS publication ; ; no. (PHS) 89-1481
Disciplina	362.1/2/0973021
Soggetti	Ambulatory medical care - United States Ambulatory medical care - France Ambulatory medical care - Germany (West) Ambulatory medical care Statistics. France Germany (West) United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"June 1989."
Nota di bibliografia	Includes bibliographical references (page 31).

2. Record Nr.	UNINA9910367566603321
Autore	Brüssow Harald
Titolo	Hurdles for Phage Therapy (PT) to Become a Reality / Harald Brüssow
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2019 Basel, Switzerland : , : MDPI, , 2019
ISBN	9783039213924 303921392X
Descrizione fisica	1 electronic resource (484 p.)
Soggetti	Biology, life sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Alternative treatment modes for antibiotic-resistant bacterial pathogens have become a public health priority. Bacteriophages are bacterial viruses that infect and lyse bacterial cells. Since bacteriophages are frequently bacterial host species-specific and can often also infect antibiotic-resistant bacterial cells, they could represent ideal antimicrobials for fighting the antibiotic resistance crisis. The medical use of bacteriophages has become known as phage therapy. It is widely used in Russia, where phage cocktails are sold in pharmacies as an over-the-counter drug. However, no phage product has been registered for medical purposes outside of the former Soviet Union. The current Special Issue of Viruses contains a collection of papers from opinion leaders in the field who explore hurdles to the introduction of phage therapy in western countries. The articles cover diverse topics ranging from patent to regulatory issues, the targeting of suitable bacterial infections, and the selection and characterization of safe and efficient phage cocktails. Phage resistance is discussed, and gaps in our knowledge of phage-bacterium interactions in the mammalian body are revealed, while other articles explore the use of phages in food production and processing.</p>
