1. Record Nr.   UNINA9910709940703321

   Autore   Bock C (Conrad)

   Titolo   Interprocess communication in the process specification language / / Conrad Bock

   Pubbl/distr/stampa   [Gaithersburg, MD] : , : U.S. Dept. of Commerce, National Institute of Standards and Technology, , [2006]

   Descrizione fisica   1 online resource (66 pages)

   Collana   NISTIR ; ; 7348

   Soggetti   Process control - Data processing
                        Production control - Data processing
                        Programming languages (Electronic computers)

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   "October 2006."
                        Contributed record: Metadata reviewed, not verified. Some fields updated by batch processes.
                        Title from page [2], viewed March 5, 2007.

   Nota di bibliografia Includes bibliographical references (pages 64-66).

   Sommario/riassunto   Interprocess communication concerns how processes affect which entities are involved in other processes. This paper provides dimensions for characterizing interprocess communication, and places common process language capabilities within them. It formalizes loosely and tightly coupled processes as extensions of the Process Specification Language (PSL), to reduce ambiguity and increase expressiveness as compared to commonly used process languages. The paper also shows how to incrementally translate common process language elements to PSL. This generates small expressions even for large process models.
