Nota di contenuto	Frontmatter -- Vorwort -- Inhalt -- Transformationen des Wissens zwischen Spätantike und Frühmittelalter -- Livius-Epitome: ein spätantiker Blick auf die (kurzgefasste) römische Republik -- Von Plinius zu Isidor und Beda Venerabilis -- Codex Theodosianus revisited -- Plädoyer für eine Geschichte der juristischen Form -- Wissensorganisation und Wissensvermittlung im ersten Teil von Isidors Etymologiae (Bücher I–X) -- Verformung, Verdrängung und Verlust von Rechtswissen in den Leges -- The Resources of the Past: Paschasius Radbertus and his Epitaphium Arsenii -- Untangling the strands: The spelling of the Épinal glossary -- Verbrannte Steuerliste oder zerstörte Verwaltung? -- The Problem of Late Merovingian Culture -- Eine Verdichtung der Lex Salica -- Hohe Weltgeschichte für langobardische Krieger -- Aus Altem ein Neues – Versuch eines Schlusswortes -- Register

Das Phänomen der Transformation und Tradition von überlieferten Wissensbeständen zeigt sich in kaum einer Epoche der europäischen Geschichte derart markant wie in der Scharnierphase zwischen Antike und Mittelalter. Über einen Zeitraum großer Instabilität hinweg wurde ein der Differenziertheit spätrömischer Gesellschaft entsprechendes hochkomplexes Wissen transformiert, reduziert und reorganisiert. Dazu kamen im Bereich der Literatur, aber auch in fachwissenschaftlichen Texten und in den Rechtscorpora unterschiedliche Techniken und Strategien quantitativer Verdichtung und Verkürzung zum Einsatz. Aus der Perspektive unterschiedlicher Disziplinen beleuchten die Beiträge des Bandes diese vielfältigen Reduktionsprozesse in Gallien, Spanien und Italien vom 4. bis zum 8. Jh. und gehen dabei insbesondere der Frage nach, inwiefern durch Exzerpieren, Kompilieren und selektives Tradieren eine Komplexitätsreduktion beziehungsweise eine Komplexitätsverlagerung stattfand. Dabei werden neue Zugänge zur Bewertung des spätantiken und frühmittelalterlichen Umgangs mit antikem Wissen gewiesen sowie innovative und kreative Praktiken offengelegt, mit denen in der untersuchten Periode vergangene Wissensbestände fruchtbar gemacht wurden.

This study examines from multiple disciplinary perspectives the phenomenon of how knowledge was transformed and transmitted between late antiquity and the Early Middle Ages. The essays explore the ways that excerpting, compiling, and selective transmission resulted in a reduction of complexity.

Sommario/riassunto

This volume addresses the creation, documentation, preservation, and study of the archaeology of lunar, planetary, and interstellar exploration. It defines the attributes of common human technological expressions within national and, increasingly, private exploration efforts, and explore the archaeology of both fixed and mobile artifacts in the solar system and the wider galaxy. This book presents the research of the foremost scholars in the field of space archaeology and heritage, a recent discipline of the field of Space Archaeology and Heritage. It provides the emerging archaeological perspective on the history of the human exploration of space. Since humans have been creating a vast archaeological preserve in space and on other celestial bodies. This assemblage of heritage objects and sites attest to the human presence off the Earth and the study of these material remains are best investigated by archaeologists and historic preservationists. As space exploration has reached the half century mark, it is the appropriate time to reflect on the major events and technological development of this particular unique 20th century arena of human history. The authors encapsulate various ways of looking at the archaeology of both fixed and mobile human artifacts in the solar system. As missions continue into space, and as private ventures gear up for public and tourist visits to space and to the Moon and even Mars, it is the appropriate time to address questions about the meaning and significance of this material culture.
