Contributed record: Metadata reviewed, not verified. Some fields updated by batch processes. Superseded by NIST Special Publication 800-18r1. Title from PDF title page. Includes bibliographical references. Nota di bibliografia Sommario/riassunto Todays rapidly changing technical environment requires federal agencies to adopt a minimum set of management controls to protect their information technology (IT) resources. These management controls are directed at individual information technology users in order to reflect the distributed nature of todays technology. Technical and operational controls support management controls. To be effective, these controls all must interrelate. This document provides a guideline for federal agencies to follow when developing the security plans that document the management, technical, and operational controls for federal automated information systems.
