

1. Record Nr.	UNINA9910711180703321
Autore	Guttman Barbara
Titolo	Computer security considerations in federal procurements : a guide for procurement initiators, contracting officers, and computer security officials // Barbara Guttman
Pubbl/distr/stampa	Gaithersburg, MD : , : U.S. Dept. of Commerce, National Institute of Standards and Technology, , 1992
Descrizione fisica	1 online resource
Collana	NIST special publication ; ; 800-4
Altri autori (Persone)	GuttmanBarbara
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	1992. Contributed record: Metadata reviewed, not verified. Some fields updated by batch processes. Superseded by NIST Special Publication 800-64. Title from PDF title page.
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This NIST Special Publication provides guidance for federal procurement initiators, contracting officers, and computer security officials on including computer security in acquisitions. To accomplish this goal, computer security and federal information processing (FIP) procurement must be integrated. Computer security is the protection of the integrity, availability and confidentiality of automated information and the resources used to enter, store, process, and communicate the information. Computer security shares properties with systems/software engineering including trustworthiness, system safety, and reliability. FIP procurement is the process of acquiring hardware, software, firmware, computer-related services and telecommunications. FIP procurement begins with the process of determining needs and ends with contract completion.
