

1. Record Nr.	UNINA9910711180803321
Autore	Wack John P
Titolo	Establishing a computer security incident response capability (CSIRC) / John P. Wack
Pubbl/distr/stampa	Gaithersburg, MD : , : U.S. Dept. of Commerce, National Institute of Standards and Technology, , 1991
Descrizione fisica	1 online resource
Collana	NIST special publication ; ; 800-3
Altri autori (Persone)	WackJohn P
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	1991. Contributed record: Metadata reviewed, not verified. Some fields updated by batch processes. Superseded by NIST Special Publication 800-61. Title from PDF title page.
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Government agencies and other organizations have begun to augment their computer security efforts because of increased threats to computer security. Incidents involving these threats, including computer viruses, malicious user activity, and vulnerabilities associated with high technology, require a skilled and rapid response before they can cause significant damage. These increased computer security efforts, described here as Computer Security Incident Response Capabilities (CSIRCs), have as a primary focus the goal of reacting quickly and efficiently to computer security incidents. CSIRC efforts provide agencies with a centralized and cost-effective approach to handling computer security incidents so that future problems can be efficiently resolved and prevented.
