Sommario/riassunto	"In a visual culture such as ours, movies represent a compelling and surprisingly effective vehicle for ethical reflection. Through the stories that unfold on the big screen-everything from The Wizard of Oz to the Bourne trilogy-viewers often gain profound insights into the moral dimension of their own lives. Through a close analysis of a variety of popular movies, foreign films, and documentaries, Seeing the Light: Exploring Ethics Through Movies represents an innovative approach to the study of ethics and the development of moral reasoning skills. Initial chapters focus on the human condition as a springboard for

ethical reflection, followed by coverage of how seven major ethical theories can provide a framework for analyzing movies for their moral message. Later chapters reveal how movies help us reflect on ethical decision-making. A diverse range of classic and contemporary films are woven throughout the text to illustrate each argument. Filled with illuminating insights and thoughtful reflection, *Seeing the Light* reveals an ethical microcosm in the world of film that can help us think more clearly about the choices we face and decisions we make in the real world"--
