

1. Record Nr.	UNINA9910711660203321
Titolo	Combating the opioid crisis : battles in the states : hearing before the Subcommittee on Oversight and Investigations of the Committee on Energy and Commerce, House of Representatives, One Hundred Fifteenth Congress, first session, July 12, 2017
Pubbl/distr/stampa	Washington : , : U.S. Government Publishing Office, , 2018
Descrizione fisica	1 online resource (iii, 114 pages) : illustrations, photographs
Soggetti	Opioid abuse - United States Opioids - Overdose - Prevention - Government policy - United States Drug addiction - Prevention - Government policy - United States Drug control - United States Drug control Opioid abuse Legislative hearings. United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Serial No. 115-43."
Nota di bibliografia	Includes bibliographical references.

2. Record Nr.	UNINA9910557626203321
Autore	Otero Marta
Titolo	Current Trends and Perspectives in the Application of Polymeric Materials for Wastewater Treatment
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2021
Descrizione fisica	1 online resource (192 p.)
Soggetti	Technology: general issues
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Water is indispensable to the functioning of most known life forms, and good water quality is essential to human health, social and economic development, and ecosystem functioning. Nonetheless, population growth has been leading to the degradation and depletion of fresh water resources. Under these circumstances, ensuring sufficient and safe water supplies for everyone is one of the Sustainable Development Goals (SDGs) set by the United Nations General Assembly in 2015 for the year 2030. For this goal to be achieved, the development and implementation of appropriate and efficient wastewater treatments that allow us to reduce water pollution is a major challenge. In view of the relevant contribution that polymers and polymeric materials may have in the conservation of the aquatic environment, namely by their application in wastewater treatment, original research and review papers on "Current trends and perspectives in the application of polymeric materials for wastewater treatment" were here brought together. For sure, this set of papers will be helpful and inspiring for readers interested in this topic.</p>
