Note generali	"Statistics are presented on sex differences in the incidence and prevalence of illnesses among the civilian noninstitutionalized population and in the utilization of nonfederally employed office-based physicians and non-Federal short-stay hospitals. Estimates are based principally on data collected in the 1979 National Health Interview Survey, the 1979 National Ambulatory Medical Care Survey, and the 1979 National Hospital Discharge Survey." "September 1983."
Nota di bibliografia	Includes bibliographical references (pages 17-18).
