The Struggle Over Power -- 7. Men, Desires, And Self-Control -- 8. What Men Fear -- Conclusion. Old Age And Manipulating Manhood -- Works Cited -- General Index -- Index Locorum
Sommario/riassunto	The concept of manhood was immensely important in ancient Athens, shaping its political, social, legal, and ethical systems. This book, a groundbreaking study of manhood in fourth-century Athens, is the first to provide a comprehensive examination of notions about masculinity found in the Attic orators, who represent one of the most important sources for understanding the social history of this period. While previous studies have assumed a uniform ideology about manhood, Joseph Roisman finds that Athenians had quite varied opinions about what constituted manly values and conduct. He situates the evidence for ideas about manhood found in the Attic orators in its historical, ideological, and theoretical contexts to explore various manifestations of Athenian masculinity as well as the rhetoric that both articulated and

questioned it. Roisman focuses on topics such as the nexus between manhood and age; on Athenian men in their roles as family members, friends, and lovers; on the concept of masculine shame; on relations between social and economic status and manhood; on manhood in the military and politics; on the manly virtue of self-control; and on what men feared.

2. Record Nr.	UNINA9910712083803321
Autore	Hosterman John W (John Wallace), <1923->
Titolo	Minerology and instrumental neutron activation analysis of seven National Bureau of Standards and three Instituto de Pesquisas Tecnologicas clay reference samples // by J.W. Hosterman [and eight others]
Pubbl/distr/stampa	[Reston, Virginia] : , : Department of the Interior, U.S. Geological Survey, , 1987
Descrizione fisica	1 online resource (iv, 38 pages) : illustrations
Collana	U.S. Geological Survey circular ; ; 957
Soggetti	Clay - Analysis Nuclear activation analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed June 22, 2018)
Nota di bibliografia	Includes bibliographical references (pages 11-12).

3. Record Nr.	UNINA9910557895103321
Autore	Isola Gaetano
Titolo	Oral Health and Environmentally Related Factors Associated with General Health and Quality of Life
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020
Descrizione fisica	1 online resource (102 p.)
Soggetti	Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The relationship of oral disease to overall disease is certainly not a new concept. For centuries, the role of oral infection and inflammation in contributing to diseases elsewhere in the body has been studied and reported. During the last few decades, a series of intriguing reports from many countries have increased the current interest in the role of oral health and disease in contributing to general health and systemic conditions. Is it possible that oral and periodontal disease is a risk factor for cardiovascular and other systemic diseases? Since this question was first posed, a phenomenal body of work has been directed at understanding how oral periodontal disease might affect distant sites and organs and, thus, have an effect on overall health. Recent studies of the human microbiome using DNA sequencing technologies have revealed new insights into the possible mechanisms that help to explain how oral infections can occur in distinct sites such as atheromas, the colon, and reproductive tissues.</p>
