Thomson's The lost boys -- Electronic memory: "a new Homeric mode" on History Television -- Sound bytes in the archive and the museum -- Conclusion. |
| Sommario/riassunto      | Of interest to historians, classicists, media and digital theorists, literary scholars, museologists, and archivists, Media, Memory, and the First World War is a comparative study that shows how the dominant mode of communication in a popular culture - from oral traditions to digital media - shapes the structure of memory within that culture.                                                                                                                                                                      |
