

1. Record Nr.	UNINA9910712998203321
Autore	Burgeson Richard N.
Titolo	Tire test variability / / by Richard N. Burgeson
Pubbl/distr/stampa	[Ann Arbor, Mich.] : , : Standards Development and Support Branch, Emission Control Technology Division, Office of Mobile Source Air Pollution Control, Office of Air and Waste Management, U.S. Environmental Protection Agency, , March 1978
Descrizione fisica	1 online resource (15 pages, 1 unnumbered page)
Soggetti	Automobiles - United States - Tires - Testing Technical reports.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"LDTP-78-01." "March, 1978."
Nota di bibliografia	Includes bibliographical references (page 11).

2. Record Nr.	UNINA9910798242503321
Autore	Yom-Tov Elad
Titolo	Crowdsourced health : how what you do on the Internet will improve medicine / / Elad Yom-Tov
Pubbl/distr/stampa	Cambridge, Massachusetts : , : The MIT Press, , [2016] ©2016
ISBN	0-262-33481-X 0-262-33480-1
Descrizione fisica	1 online resource (155 p.)
Disciplina	610.285
Soggetti	Internet in medicine Internet research Social media Online social networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Our data, ourselves -- Answering the unaskable -- Anorexia : a disease online -- Questions of public health -- What patients want to know about their disease, and how information from the internet can help them.
Sommario/riassunto	Most of us have gone online to search for information about health. What are the symptoms of a migraine? How effective is this drug? Where can I find more resources for cancer patients? Could I have an STD? Am I fat? A Pew survey reports more than 80 percent of American internet users have logged on to ask questions like these. But what if the digital traces left by our searches could show doctors and medical researchers something new and interesting? What if the data generated by our searches could reveal information about health that would be difficult to gather in other ways? In this book, Elad Yom-Tov argues that internet data could change the way medical research is done, supplementing traditional tools to provide insights not otherwise available.
