

1. Record Nr.	UNINA9910713334603321
Autore	Veilleux Andrea G.
Titolo	Methods for estimating regional coefficient of skewness for unregulated streams in New England, based on data through water year 2011 / / by Andrea G. Veilleux [and five others]
Pubbl/distr/stampa	Reston, Virginia : , : U.S. Department of the Interior, U.S. Geological Survey, , 2019
Descrizione fisica	1 online resource (iv, 29 pages) : color illustrations, color maps
Collana	Scientific investigations report, , 2328-0328 ; ; 2017-5037
Soggetti	Flood forecasting - New England - Mathematical models Stream measurements - New England - Mathematical models Streamflow - New England - Mathematical models Rain and rainfall - New England - Mathematical models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes data release: Annual peak-flow data and PeakFQ output files for selected streamflow gaging stations operated by the U.S. Geological Survey in the New England region that were used to estimate regional skewness of annual peak flows.
Nota di bibliografia	Includes bibliographical references (pages 15-17).
