

1. Record Nr.	UNINA9910714272003321
Titolo	Cumulative effects : from assessment towards management
Pubbl/distr/stampa	Victoria, B.C., : Forest Practices Board, 2011
Descrizione fisica	1 electronic text (i, 12 p.) : digital file
Collana	Special report / British Columbia. Forest Practices Board ; ; FPB/SR/39
Disciplina	333.75/1/09711
Soggetti	Forest management - British Columbia Range management - British Columbia Sustainable forestry - British Columbia Forest policy - British Columbia Case study Conservation biology Cumulative effects (environment) Decision-making Ecosystem Educational assessment Environmental impact assessment Evaluation Forestry License
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"March 2011".
Nota di bibliografia	Includes bibliographical references (p. 15-17).
Nota di contenuto	Executive summary -- 1.0. Background. 1.1. What are cumulative effects? -- 2.0. Issues with current approaches to cumulative effects assessment and management -- 3.0. Towards a land management framework. 3.1. Separating the value discussion from the assessment methods ; 3.2. Choosing indicators for values ; 3.3. Being specific about objectives ; 3.4. The need for good information -- 4.0. Conclusions -- 5.0. End notes.
Sommario/riassunto	The Forest Practices Board has had growing concerns about the cumulative effects of resource use on the British Columbia (BC) land

base for a number of years. In our work examining forest and range practices, it was often apparent that other activities were impacting the land and water; activities that were not regulated under the Forest and Range Practices Act.
