Sommario/riassunto	This book offers a detailed review of Covid-19 pandemic, its impact on the world and the global efforts to develop effective vaccines against the virus. There has been a competitive race between countries and pharmaceutical companies to create a vaccine to end this pandemic. This raises a debate about the true intentions behind this race: Is it for profit, political influence or for recognition? The book presents the most important pandemics and vaccines used against them throughout history from 165 AD until today for the purpose of learning from past experiences.
