

1. Record Nr.	UNINA9910715298603321
Autore	Knorr Daniel Brainard <1976->
Titolo	Production of advanced biofuels via liquefaction : hydrothermal liquefaction reactor design / Dan Knorr, John Lukas, and Paul Schoen ; Harris Group, Inc
Pubbl/distr/stampa	Golden, CO : , : National Renewable Energy Laboratory : , : National Advanced Biofuels Consortium, , 2013
Descrizione fisica	1 online resource (approximately 90 pages) : illustrations
Collana	NREL/SR ; ; 5100-60462
Soggetti	Energy conversion - Research Biomass energy - Research Pyrolysis Chemical reactors
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"November 2013."
Sommario/riassunto	This report provides detailed reactor designs and capital costs, and operating cost estimates for the hydrothermal liquefaction reactor system, used for biomass-to-biofuels conversion, under development at Pacific Northwest National Laboratory. Five cases were developed and the costs associated with all cases ranged from \$22 MM/year - \$47 MM/year.
