

1.	Record Nr.	UNINA990009957280403321
	Autore	Kuhn, Max
	Titolo	Applied predictive modeling / Max Kuhn, Kjell Johnson
	Pubbl/distr/stampa	New York : Springer, 2013
	ISBN	978-1-4614-6848-6
	Descrizione fisica	xiii, 600 p. : ill. ; 24 cm
	Altri autori (Persone)	Johnson, Kjell
	Disciplina	519.5
	Locazione	FSPBC
	Collocazione	VI E 1531
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910453869303321
	Autore	Timmermans Stefan <1968->
	Titolo	Postmortem [[electronic resource]] : how medical examiners explain suspicious deaths / / Stefan Timmermans
	Pubbl/distr/stampa	Chicago, : University of Chicago Press, 2006
	ISBN	1-281-96667-3 9786611966676 0-226-80400-3
	Descrizione fisica	1 online resource (378 p.)
	Collana	Fieldwork encounters and discoveries
	Disciplina	616.07/59
	Soggetti	Forensic sciences Criminal investigation Autopsy Death - Causes Death - Proof and certification Medical examiners (Law) Electronic books.
	Lingua di pubblicazione	Inglese

Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [331]-356) and index.
Nota di contenuto	Introduction: Brokering suspicious deaths -- Making the case for heart disease -- The fifty-one percent rule of suicide -- Forensic credibility at the "nanny trial" -- The perfect crime -- A baby died. Where were the parents? -- The organ and tissue trade -- Conclusion: The hope of forensic authority -- Postscript: "How can you watch autopsies?"
Sommario/riassunto	As elected coroners came to be replaced by medical examiners with scientific training, the American public became fascinated with their work. From the grisly investigations showcased on highly rated television shows like C.S.I. to the bestselling mysteries that revolve around forensic science, medical examiners have never been so visible- or compelling. They, and they alone, solve the riddle of suspicious death and the existential questions that come with it. Why did someone die? Could it have been prevented? Should someone be held accountable? What are the implications of ruling a death a suicide, a homicide, or an accident? Can medical examiners unmask the perfect crime? Postmortem goes deep inside the world of medical examiners to uncover the intricate web of pathological, social, legal, and moral issues in which they operate. Stefan Timmermans spent years in a medical examiner's office, following cases, interviewing examiners, and watching autopsies. While he relates fascinating cases here, he is also more broadly interested in the cultural authority and responsibilities that come with being a medical examiner. Although these professionals attempt to remain objective, medical examiners are nonetheless responsible for evaluating subtle human intentions. Consequently, they may end-or start-criminal investigations, issue public health alerts, and even cause financial gain or harm to survivors. How medical examiners speak to the living on behalf of the dead, is Timmermans's subject, revealed here in the day-to-day lives of the examiners themselves.

3. Record Nr.	UNINA9910715306603321
Titolo	Report of investigation Agency access to the SSCI shared drive on RDINet
Pubbl/distr/stampa	[Washington, D.C.] : , : Central Intelligence Agency, Office of Inspector General, , 2014
Descrizione fisica	1 online resource (approximately 57 pages)
Soggetti	Computer networks - Access control - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Approved for release date 14-Jan-2015." "2014-11718-IG." "18 July 2014." Contains redactions.
