Sommario/riassunto	The number of ICD patients is increasing sharply, yet the number of electrophysiologists-physicians who specialize in the electrical system of the heart-is not increasing as dramatically. The result of this influx is that more and more ICD patients are being treated by physicians and staff with little or no ICD training. There are many fine books on device-based therapy for the heart, but most are written for the experts. Whether you read it from cover-to-cover or use it for reference (or both), it is written primarily with you in mind - for people who are actually involved in the clinic
