Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Batch processed record: Metadata reviewed, not verified. Some fields updated by batch processes. FDLP item number not assigned.

2. Record Nr.	UNINA9910838289303321
Autore	Devlin Kerry
Titolo	Music Therapy and Music-Based Interventions in Neurology [[electronic resource] ] : Perspectives on Research and Practice // edited by Kerry Devlin, Kyurim Kang, Alexander Pantelyat
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Humana, , 2023
ISBN	3-031-47092-3
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (239 pages)
Collana	Current Clinical Neurology, , 2524-4043
Altri autori (Persone)	KangKyurim PantelyatAlexander
Disciplina	615.85154
Soggetti	Neurology Nervous system - Diseases Neurological Disorders
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction: Principles and Overview of Music therapy and music-based intervention -- Mechanisms of Music Therapy and Music-Based Interventions -- Music for Stroke Rehabilitation -- Music for Traumatic Brain Injury and Impaired Consciousness -- Music for Movement Disorders -- Music for Speech Disorders -- Music for Memory Disorders -- Music for Neuro-Oncological Disorders -- Music Therapy and Music-Based Interventions for Neurologic Palliative Care -- Music for Autoimmune Neurological Disorders -- Music for Epilepsy -- Music for Surgical/Perioperative Care -- Telehealth Music Therapy in Adult Neurological Care -- Therapeutic Technology for Music-Based Interventions -- Music therapy and music-based approaches with autistic people: A Neurodiversity Paradigm-informed perspective -- Psychosocial Aspects of Music Therapy -- Conclusions and Future Directions.
Sommario/riassunto	This book synthesizes knowledge about the myriad ways music can support the physical and psychosocial needs of people living with neurological diagnoses. It may be a useful tool for those working or training as music therapists, as well as clinicians and patients interested in the use of music and rhythm to address individualized

healthcare goals. The editors of this book advocate for a collaborative, holistic approach to the implementation of music-based interventions, acknowledging that different (and at times, conflicting) approaches do exist – and that different patients may require exploration of different approaches to have their needs and desires met in ways most meaningful to them. The book's many contributors embody this desire to hold space for wide-ranging views on clinical practice through the ways they share their own perspectives as music therapists, neurologists, nurses, speech and language pathologists, and neuroscience researchers from across the globe. Each chapter is centered around clinical work in context with a specific patient community – be that a diagnosis (e.g., movement disorders), shared culture (e.g., autistic culture), disease stage (e.g., end of life), or targeted clinical need (e.g., psychosocial support and/or functional performance) – and features a summary of available research with case examples and clinical descriptions to highlight different conceptualizations of the role of music in the care of patients with neurologic diagnoses.
