Sommario/riassunto	Ce dossier a pour objet les relations turco-russes qui, depuis la période post-bipolaire, ont suivi un cours instable fait de rapprochements spectaculaires mais aussi de crises qui sont allées, au moins une fois, jusqu'à la rupture. Au cours des trois décennies qui ont suivi la guerre froide, en dépit de cette inconstance, c'est bien une convergence croissante qui s'est affirmée. Marquée par un ensemble d'initiatives politiques, économiques et culturelles, ces dernières ont permis d'institutionnaliser les rapports entre les deux pays. Les relations économiques et notamment le commerce des hydrocarbures ont sans doute contribué au renforcement des rapports turco-russes. Cependant, on constate que la démarche qui a longtemps consisté à privilégier la convergence d'intérêts économiques, pour faire oublier les divergences politiques et stratégiques, est désormais révolue. La coopération qui s'est reconstruite entre les deux pays après l'épisode pénible de 2015-2016 le montre bien, car des antagonismes demeurent.

Sommario/riassunto

This open access book offers unique and novel views on the social innovation landscape, tools, practices, pedagogies, and research in the context of higher education. International, multi-disciplinary academics and industry leaders present new developments, research evidence, and practice expertise on social innovation in higher education institutions (HEIs), across academic and professional disciplines. The book includes a selected set of peer-reviewed chapters presenting different perspectives against which relevant actors can identify and analyse social innovation in HEIs. The volume demonstrates how HEIs can respond to societal challenges, support positive social change, and contribute to the development of international public policy discourse. It answers the question 'how does the present higher education system, in different countries, promote social innovation and create social change and impact'. In answering this question, the book identifies factors driving success as well as obstacles. Furthermore, it examines how higher education innovation assists societal challenges and investigates the benefits of effective social innovation engagement by HEIs. The interdisciplinary approach of the volume makes it a must-read for scholars, students, policy-makers, and practitioners of economics, education, business and management, political science, and sociology interested in a better understanding of social innovation.
