

1. Record Nr.	UNINA9910716447703321
Titolo	Experimental bacterial and chemical pollution of wells via ground water, and the factors involved, by C.W. Stiles, H.R. Crohurst, and Gordon E. Thomson. Report on the geology and ground water hydrology of the experimental area of the United States Public Health Service at Fort Caswell, N.C. by Norah Dowell Stearns. [U.S. Hygienic Laboratory Bulletin No. 147. June 1927.]
Pubbl/distr/stampa	[Washington, D.C.] : , : [U.S. Government Printing Office], , 1927
Descrizione fisica	1 online resource (177 pages) : illustrations, tables
Collana	House document / 69th Congress, 2nd session. House ; ; no. 597 [United States congressional serial set] ; ; [serial no. 8746]

Table of contents, p. V.

General discussion and summary of results, by C.W. Stiles, p. 4.

Experimental spread of pollution in ground water in sand at Fort Caswell, N.C., by C.W. Stiles, H.R. Crohurst, and G.E. Thomson, p. 14.

Recovery of experimental *Bacillus coli* from the soil, by C.W. Stiles, and G.E. Thomson, p. 81.

Uranin test to demonstrate pollution of wells, by C.W. Stiles, H.R. Crohurst, and G.E. Thomson, p. 84.

Various factors of environment tending to decrease the amount of pollution in polluted ground water, by C.W. Stiles and H.R. Crohurst, p. 88.

Location of pits, etc., in reference to water supply as influenced by ground water pollution, by C.W. Stiles and H.R. Crohurst, p. 91.

Interrelation of rainfall and ground water at Fort Caswell, by G.E. Thomson, p. 98.

Types of experimental wells devised for the Fort Caswell ground water experiments, by Harry R. Crohurst, p. 119.

Experimental distribution of *Bacillus coli* in the soil under and near pits, by C.W. Stiles and C.L. Pfau, p. 122.

Bacteriological technique used at Fort Caswell, N.C., by G.E. Thomson, p. 135.

Report on the geology and ground water hydrology of the experimental area of the United States Public Health Service at Fort Caswell, N.C., by Norah Dowell Stearns, p. 137.

Batch processed record: Metadata reviewed, not verified. Some fields updated by batch processes.

FDLP item number not assigned.
