

1. Record Nr.	UNINA9910716943403321
Titolo	Department of Defense climate risk analysis
Pubbl/distr/stampa	[Washington, DC] : , : Department of Defense, , 2021
Descrizione fisica	1 online resource (18 pages) : color illustrations, map
Soggetti	Climatic changes - Risk assessment National security - Environmental aspects - United States Climate change mitigation - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Report Submitted to National Security Council ... October 2021."
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	The risks of climate change to Department of Defense (DoD) strategies, plans, capabilities, missions, and equipment, as well as those of U.S. allies and partners, are growing. Global efforts to address climate change (including actions to address the causes as well as the effects) will influence DoD strategic interests, relationships, competition, and priorities. To train, fight, and win in this increasingly complex environment, DoD will consider the effects of climate change at every level of the DoD enterprise. The DCRA is an important step towards integration of climate change considerations at DoD. To understand specific climate effects on plans, resourcing, operations, and missions, DoD Components will include climate considerations in relevant risk analyses, leveraging high-quality data, scenarios, and analytical tools tailored to DoD needs. Working within the whole-of-government, and in coordination with allies and partners, DoD will strive to prevent, mitigate, account for, and respond to defense and security risks associated with climate change.
