

1. Record Nr.	UNISA990003200880203316
Autore	BARRECA, Giuseppina uciana
Titolo	I procedimenti di istruzione preventiva dopo la riforma : (artt. 692-699 cod. proc. civ.) / Giuseppina Luciana Barreca
Pubbl/distr/stampa	Milano : Giuffrè, 2009
ISBN	88-14-14780-9
Descrizione fisica	269 p. ; 24 cm
Collana	Itinerari nel processo civile
Disciplina	344.4507
Soggetti	Provvedimenti d'urgenza
Collocazione	XXVII.1.E 3
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2.	Record Nr.	UNINA9910717010403321
	Autore	Elggqvist Emma
	Titolo	Evaluating emissions reductions from DERs in REopt Lite
	Pubbl/distr/stampa	[Golden, Colo.] : , : [National Renewable Energy Laboratory], , [2021]
	Descrizione fisica	1 online resource (17 pages) : color illustrations, color maps
	Collana	NREL/PR ; ; 7A40-80658
	Soggetti	Renewable energy sources Distributed generation of electric power
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Author: Emma Elggqvist. "Energy exchange, connecting the future, August 2-6, 2021."
3.	Record Nr.	UNINA9910774893203321
	Titolo	Computational approaches to semantic change . Volume 6 / / edited by Nina Tahmasebi [and four others]
	Pubbl/distr/stampa	Berlin : , : Language Science Press, , 2021
	Descrizione fisica	1 online resource (396 pages)
	Collana	Language variation
	Disciplina	372.6
	Soggetti	Language arts Language arts - United States
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di bibliografia	Includes bibliographical references and index.
	Sommario/riassunto	Semantic change - how the meanings of words change over time - has

preoccupied scholars since well before modern linguistics emerged in the late 19th and early 20th century, ushering in a new methodological turn in the study of language change. Compared to changes in sound and grammar, semantic change is the least understood. Ever since, the study of semantic change has progressed steadily, accumulating a vast store of knowledge for over a century, encompassing many languages and language families. Historical linguists also early on realized the potential of computers as research tools, with papers at the very first international conferences in computational linguistics in the 1960s. Such computational studies still tended to be small-scale, method-oriented, and qualitative. However, recent years have witnessed a sea-change in this regard. Big-data empirical quantitative investigations are now coming to the forefront, enabled by enormous advances in storage capability and processing power. Diachronic corpora have grown beyond imagination, defying exploration by traditional manual qualitative methods, and language technology has become increasingly data-driven and semantics-oriented. These developments present a golden opportunity for the empirical study of semantic change over both long and short time spans.
