

1. Record Nr.	UNINA9910717344303321
Autore	Bloomfield Hanna E
Titolo	Safe and Effective Anticoagulation in the Outpatient Setting // Hanna E Bloomfield, Timothy J Wilt, and Brent C Taylor
Pubbl/distr/stampa	Washington, D.C. : , : Department of Veterans Affairs (US), , 2011
Descrizione fisica	1 online resource (iii, 88 pages)
Disciplina	362.10973
Soggetti	Ambulatory medical care - United States United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Evidence-based synthesis program." "February 2011."
Nota di bibliografia	Includes bibliographical references (pages 54-61).
Sommario/riassunto	The primary objectives of this systematic review were to: 1. Determine whether specialized anticoagulation clinics (ACC) are more effective and safer than care in non-specialized clinics (e.g., primary care clinics, physician offices) for management of long- term anticoagulation in adults; 2. Determine whether patient self testing (PST), either alone or in combination with patient self management (PSM), is more effective and safer than standard care; and 3. Identify the risk factors for serious bleeding in patients on chronic anticoagulant therapy.
