| Titolo | Evidence map of yoga for high-impact conditions affecting veterans // Remy R. Coeytaux [and nine others] |
| Pubbl/distr/stampa | Washington, District of Columbia : , : Department of Veterans Affairs (US), , [2014] ©2014 |
| Descrizione fisica | 1 online resource (iv, 82 pages) : illustrations (some color) |
| Collana | Evidence-based synthesis program |
| Disciplina | 613.7046 |
| Soggetti | Yoga - Therapeutic use Veterans - Medical care - United States Evidence-based medicine - United States Technical reports. United States |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | "Evidence-based synthesis program." "August 2014." |
| Nota di bibliografia | Includes bibliographical references. |
| Sommario/riassunto | Patient-centered care supports the active involvement of patients and their families in the decision-making process between options for treatment. Part of this mission is to identify, develop, and implement new practices and approaches that are found to be effective in promoting the transformation to a patient-centered model and improved patient care. Complementary and alternative medicine (CAM) strategies such as yoga are widely available in the private sector, and some Veterans would like access to these strategies through the Veterans Affairs (VA) system. Determining the state of evidence on the benefits and harms of yoga and other CAM modalities is a priority for the Veterans Health Administration (VHA). To fulfill the joint research needs of the Office of Patient Centered Care and the Field Advisory Committee on Complementary and Alternative Medicine, and to help VA leadership determine the most appropriate guidelines/policy for the implementation of CAM therapies within the VA, the Evidence-based |

Synthesis Program Coordinating Center proposed a CAM evidence mapping project to evaluate the existing evidence on yoga for common clinical conditions in Veterans.
