Nota di contenuto	Preliminary Material -- "Every Inch a King". Kings and Kingship in the Ancient and Medieval Worlds / Lynette Mitchell and Charles Melville -- Defining the Divine in Achaemenid Persian Kingship: The View from Bisitun / Margaret Cool Root -- Xenophon's Cyropaedia: Fictive History, Political Analysis and Thinking with Iranian Kings / Christopher Tuplin -- Alexander the Great: Divinity and the Rule of Law / Lynette Mitchell -- Seleucus I, Zeus and Alexander / Kyle Erickson -- Machiavelli and Xenophon's Cyrus: Searching for the Modern Conceptions of Monarchy / Waller R. Newell -- Ruling "Virtually"? Royal Images in Medieval English Law Books / Anthony Musson -- The Anomalous King of Conquered England / Laura Ashe -- Telling Tales of Adulterous Queens in Medieval England: From Olympias of Macedonia to Elizabeth Woodville / Joanna Laynesmith -- Royalty Reflected in the Chronicles of Froissart / Peter Ainsworth -- Breaking and Making Tradition: Æthelstan, Abd-al-Rahman III and Their Panegyrists / Shane Bobrycki -- The King As Subject, Master and Model of Authority: The Case of Alfonso X of Castile / Antonella Liuzzo Scopo -- God and Caesar: The

Dynamics of Visigothic Monarchy / Andrew Fear -- "On the Road Again": Kings, Roads and Accommodation in High Medieval Germany / John W. Bernhardt -- Ruling from the Outside: A New Perspective on Early Turkish Kingship in Iran / David Durand-Guédy -- The Royal Image in Mongol Iran / Charles Melville -- Architecture and the Representations of Kingship during the Reign of the Safavid Shah Abbas I / Kishwar Rizvi -- Index.

Sommario/riassunto

The role of kings, the source of their authority and the nature of the practical restraints on their power have exercised political and religious philosophers, historians, competing candidates for rule and subject populations from the time of the earliest documented human societies. How the kingly image is created and presented and how the ruler performs his or her function as the source of justice are among the topics addressed in this volume, which also covers the role of queens in maintaining dynastic succession yet being the target of tales of adultery. This volume is of particular interest in bringing together studies of kingly power from Cyrus the Great and Alexander in the ancient world to Shah Abbas in the seventeenth century, and covering the European Middle Ages as well as Iran and the Muslim world.

2. Record Nr.	UNINA9910717370403321
Autore	Haney Elizabeth M.
Titolo	Suicide risk factors and risk assessment tools : a systematic review / / Elizabeth M. Haney [and seven others]
Pubbl/distr/stampa	Washington, D.C. : , : Dept. of Veterans Affairs, Health Services Research & Development Service, , [2012] ©2012
Descrizione fisica	1 online resource (iii, 133 pages) : illustrations
Collana	Evidence-based Synthesis Program

Soggetti	Suicide - Risk factors United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Evidence-based synthesis program." "March 2012."
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Suicide is a major public health concern in the United States (US), claiming over 36,000 lives each year and nearly 100 lives each day, and suicide among military and Veteran populations is of particular concern. Veterans returning from the Iraq and Afghanistan conflicts, referred to as Operation Enduring Freedom/Operation Iraqi Freedom (OEF/OIF) Veterans, may be particularly at risk, although the limited available data has shown mixed results. Several aspects of military experience may increase the risk of suicide, including mental health and substance abuse. Many risk factors specific to the OEF/OIF population have yet to be thoroughly evaluated and incorporated into clinical management. Ideally, suicide risk assessment tools need to account for the relationship among different risk factors and identify risk factors or combinations of risk factors that are particularly associated with suicidal self-directed violence. To be practically useful, such tools will be brief enough to be conducted in a primary care setting and will identify a threshold beyond which preventive action should be taken. Risk assessment tools should be able to discriminate those at high- and low-risk for suicidal self-directed violence.

Likewise, studies of emerging risk factors need to evaluate the contribution of a new potential predictor of suicide and self-directed violence in the context of known risk factors in order to weigh the contribution of the new risk factor against those that are currently known. The objective of this report is to review recent evidence about risk factors and risk assessment tools within Veteran and military populations to provide evidence for clinical practice guideline development specific to these populations.
