Sommario/riassunto	It is our great pleasure to welcome you to the 2023 ACM International Workshop on Security and Privacy Analytics - IWSPA 2023. This year's workshop is the ninth in the series and co-hosted with the Thirteenth ACM Annual Conference on Data and Applications Security and Privacy (CODASPY 2023). IWSPA addresses important research topics associated with the application of data analytics tools and techniques (including statistical, machine learning, data mining, and natural language processing) to challenges that arise with security and privacy preservation. IWSPA provides a forum for the interaction between researchers in these areas, identifying and pursuing new topics that arise in the intersection between the fields of Artificial Intelligence and Cybersecurity.
