Sommario/riassunto	This book continues the discussion from Volume 1 on the general considerations regarding global changes and contemporary economic issues in Asian countries in real terms. It offers a collection of original conference papers from the annual international conferences on "Contemporary economic issues in Asian countries" (CEIAC Conference) commenced in 2022 in collaboration with CIFOR-ICRAF, Sungkyunkwan University (Korea), and Tamkang University (Taiwan). The theme of the

CEIAC Conference 2022 deals with broad aspects of the contemporary economic issues in Asian countries. It covers topics such as economics and business (economic theory, national and international income distribution, macroeconomic policies, sectors of economy, productivity developments, financial market, business governance, bank financing, etc.), green economy and sustainable development (developing process, development policy, public policy, sustainable growth, green growth, etc.), and international trade and investment (international trade theory, free trade agreements, tariffs, intellectual property, international law, etc.). The book would interest a wide array of professors, researchers, lecturers, students in fields of economics, consultants, and decision makers interested in the issues related to economic issues in Asia. .
