

1. Record Nr.	UNINA9910717425903321
Titolo	Advances in mechanical engineering : selected contributions from the Conference "Modern Engineering: Science and Education", Saint Petersburg, Russia, June 2022 // edited by Alexander N. Evgrafov
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2023] ©2023
ISBN	3-031-30027-0
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (IX, 214 p. 117 illus., 68 illus. in color.)
Collana	Lecture Notes in Mechanical Engineering, , 2195-4364
Disciplina	780
Soggetti	Mechanical engineering Mechanics, Applied
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Axial Rotary Forging of the Thin Wall Inner Flanges With Fixed and a Movable Dies -- Calculated Dependences for Determining Theoretical Stress Concentration Factors in a Welded T-joint -- Investigation of the Friction Self-Oscillation in Two-Mass System -- An Overview of Methods to Form Orthogonal Polyhedra for the Problems of Packing Objects of Complex Shape -- Index.
Sommario/riassunto	This book draws together the most interesting recent results to emerge in mechanical engineering in Russia, providing a fascinating overview of the state of the art in the field in that country which will be of interest to a wide readership. A broad range of topics and issues in modern engineering is discussed, including dynamics of machines, materials engineering, structural strength and tribological behavior, transport technologies, machinery quality and innovations. The book comprises selected papers presented at the 11th conference "Modern Engineering: Science and Education", held at the Saint Petersburg State Polytechnic University in June 2022 with the support of the Russian Engineering Union. The authors are experts in various fields of engineering, and all of the papers have been carefully reviewed. The book is of interest to mechanical engineers, lecturers in engineering disciplines and engineering graduates.
